Allowable Subject Matter

Claims 25, 26 and 29-41 are allowed.

The following is an examiner's statement of reasons for allowance: Lee et al (US 6,377,093) discloses a method of generating delay locked clocks as shown in figure 10 and described in the previous office action. Lee does not disclose determining a second phase difference between an inverse clock and an inverted delayed clock signal to establish a delay magnitude nor inverting and delaying the first delayed clock signal by a second delay magnitude to generate the inverted delayed clock signal as stated in the claims. Lundberg et al (US 5,811,998) discloses inverting an input to a phase detector as shown in figure 4 but does not disclose the limitations stated in the claims. Yoo et al (US 6,625,242) discloses comparing a phase difference and a phase shifter for inverting a delayed clock according to that difference (abstract and figure 2). Yoo does not disclose the output of the phase shifter 23 is input to the phase detector 27. Finally, Li et al (US 6,704,881) discloses, in figures 1 and 2, the prior art circuits shown in the instant application (figures 1 and 2). Li does not disclose the second phase detector as stated in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
